

# JUE-250 FleetBroadband

*– introducing pioneering solutions for the next-generation FleetBroadband communication service*

**Upgrade path™ from JRC Fleet 33**  
**Reliable broadband data and voice**  
**Dedicated compact solution**  
**Cost-effective performance and flexibility**  
**Takes your vessel into future standards**

# JUE-250 FleetBroadband

## – performance features

### Unique features

- The JUE-250, a pioneering next-generation satellite communication terminal, delivers the most advanced maritime service available, fully contributing to the operational efficiency of vessel and crew.

### Meet the challenges with FleetBroadband

FleetBroadband gives you faster, more cost-effective access to broadband services, offering seafarers an affordable voice and data option, while providing your vessel with a coverage area of millions of square miles. It is more powerful than any other solution on the market, allowing you to have the capability to reach peak performance and gain a competitive edge.

### Simultaneous access

This next-generation solution offers an unparalleled range of services to suit all types and tonnages of vessels. The service provides simultaneous voice and broadband data through a compact antenna, allowing you to run online operation systems, whilst still having access to email, intranet and voice calls – a significant improvement to both operational and social use.

### Cost-effective service

With FleetBroadband, performance and flexibility do not come at a high price. Existing JRC Fleet 33 customers can utilise our dedicated upgrade path™ to make global voice and broadband data more accessible than ever before. You will achieve greater operational efficiencies and significantly reduce the cost of both business and crew communications.

### Optimal connectivity

Enhanced connectivity, based on 3G standards, provides constant, simultaneous access to voice and high-speed data in a compact solution, designed specifically for the marine environment.

**Standard IP** for email, internet and intranet access via a secure VPN connection, at speeds up to 284 kbps and **streaming IP** guaranteed data rates up to 128 kbps.

## – developed for maximum ease of use

### Upgrade path™ – exclusively by JRC

The existing JUE-33 Inmarsat Fleet 33 is fully compatible and specifically designed to meet the industry-changing FleetBroadband services. This makes it necessary to replace only the main unit rather than obtaining a completely new system. This unique, cost-effective feature will provide seamless ocean coverage from 76° North to 76° South – all via a single main unit upgrade.

### Flexible interfacing

JRC's JUE-250 terminal has been developed for maximum flexibility. It features a reliable industry standard interfacing field that can be integrated with navigational equipment. No gyro or GPS input is required and by having JRC's proven no cable unwrap system integrated, operational efficiency is guaranteed.

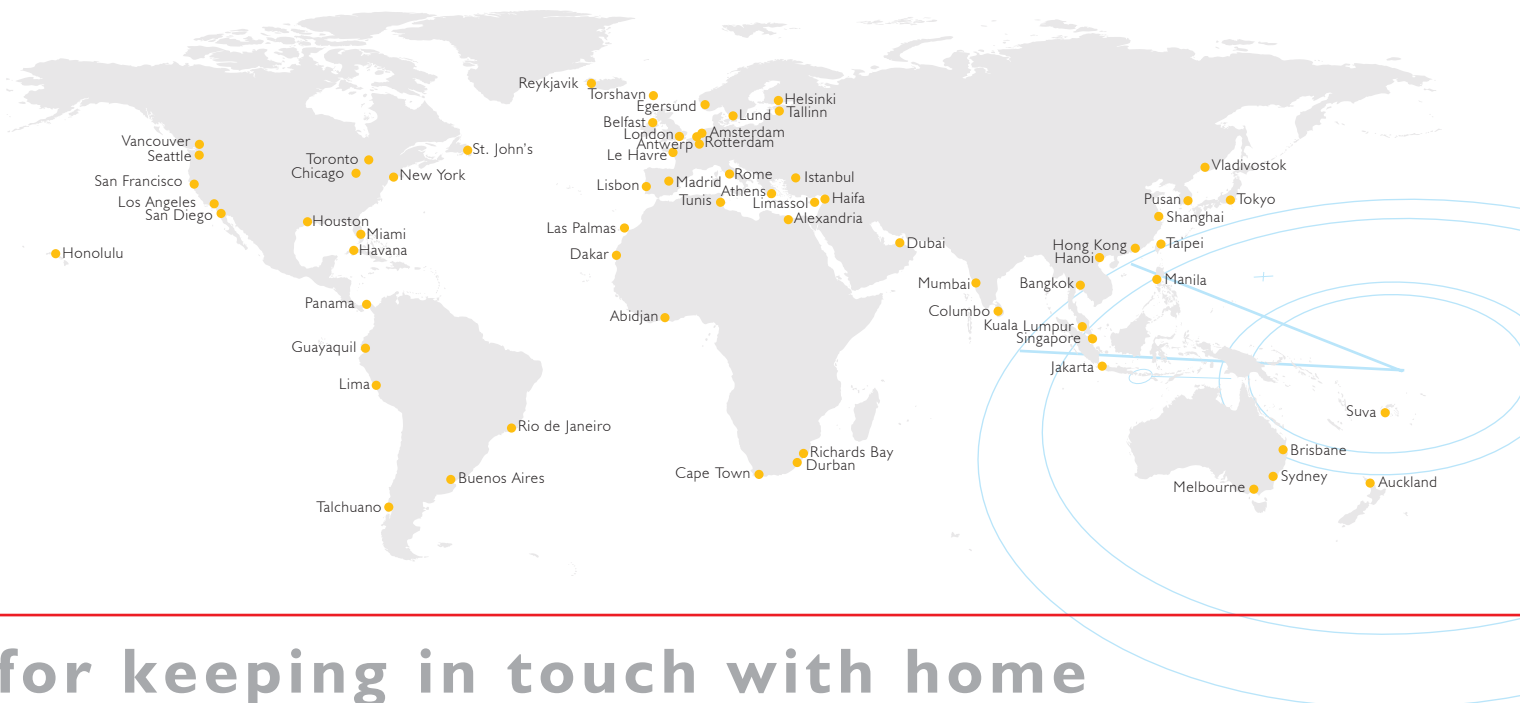

This below deck unit enables users to have optimal connectivity no matter what the conditions or your position at sea.

- ISDN connection (audio only)
- LAN connection
- USB connection
- Dedicated JRC handset
- TEL/FAX lines RJ 11
- WRF output

### JRC StarNetwork™

JRC has been providing sales and support of products since 1915. Today, JRC offers comprehensive assistance through its organisation, in partnership with a worldwide StarNetwork™ of over 270 fully trained and qualified partners and agents, assisting you 24 hours a day, 7 days a week and 365 days a year.

## – coverage and flexibility

### Inmarsat and JRC, strong together

Inmarsat has been the leading communication provider of satellite services for nearly 30 years, playing an integral role in the lives of seafarers. The Inmarsat Fleet services and JRC terminals have become the standard for deep-sea ships. Now, Inmarsat enhances its maritime portfolio with the launch of FleetBroadband and together with JRC's next-generation solution we can deliver reliable communications and safety services, contributing to the operational efficiency of vessel and crew.

#### • FleetBroadband coverage

The map depicts Inmarsat's expectations of coverage, but does not represent a guarantee of service. The availability of service at the edge of coverage areas fluctuates depending on various conditions. The launch date of the F-3 satellite will be determined in due course. FleetBroadband coverage May 2007.

### Total system flexibility

JRC's JUE-250 is a dedicated compact solution, which shares the same simple configuration as the JUE-33 Fleet 33, allowing for an easy setup. This concept also reduces the installation costs as only a single coax cable will be used between the antenna and the below deck unit. This next-generation service is for the new-build and retrofit markets and is available as a full system or an upgrade path™. It is also possible to connect your own supplied hardware, such as a computer and fax.

## – specifications

Model		JUE-250
Inmarsat type approved		✓
Frequency		
Transmit		1626.5MHz - 1660.5MHz
Receive		1525.0MHz - 1559.0MHz
Communication		
Voice		4kbps and digital 3.1kHz audio
Fax		group 3 fax via 3.1kHz audio
Data		standard IP: 284kbps / streaming IP: 128kbps
SMS		standard 3G (up to 160 characters)
Antenna		
Type		flat diameter 30cm (approx)
Polarisation		right-hand circular
Beam width		30° at 3dB down
Pointing		electrical beam tracking with 3-axis stabilisation
Enclosure		AES radome (diameter 0.35m)
Primary power		
Voltage		DC 24V (-20% +30%)
Consumption		[120VA] max
Environmental conditions		
Ambient condition		temperature: antenna -25°C +55°C temperature: main unit -15°C +55°C
Relative humidity		+40°C up to 95%
Icing		up to 25mm
Precipitation		up to 100mm/hour
Wind		up to 100 knots in operation up to 120 knots in survival
Vibration		at 2-13.2Hz amplitude ±1mm ±10% at 13.2-100Hz max acceleration 7m/s <sup>2</sup>
Coverage		
Azimuth		360°
Elevation		5° to 90°
Ship's motion		
Roll		±30°/8 sec
Pitch		±10°/6 sec
Yaw		±8°/50 sec
Surge		±0.2g
Sway		±0.2g
Heave		±0.5g
Turning rate		6°/sec
Headway		30 knots
Tuning		1.25kHz
E.I.R.P.		+15.1dBW +1/-2dB
G/T		-15.5dB/K or more
Optional items		
Power supply unit		NBD-577C (AC 110/220V to DC 24V)

All specifications are subject to change without notification.
